### Simply Hue Designs

I said goodbye to my old blackberry phone and hello to the iphone. I have never been much of a cell phone aficionado. A cell phone used to be a nuisance to me and the battery would inevitably be going low the times I really needed to use it. However, I'm enjoying my iPhone, and I'm still learning all of the bells and whistles on it. Being from the old school of keypads the touch screen took a little getting used to.

Not only am I excited about my phone, but all of the cool cases you can get for it. I found this one by Simply Hue Designs on [Society6](#). I recently completed an online creativity course by the artist Vicki Dvorak. I love her vintage and whimsical style and already have my eye on another one of her cases. If a girl can have multiple purses why not phone cases. After all, they have become somewhat of the new accessory. Please feel free to comment if you have any favorite apps.
