

Easter Peeps

Description

default watermark

Marshmallow Peeps marked the beginning of the Easter season when I was a kid. Their sugary sparkles glistened behind plastic packaging screaming the Easter Bunny is coming soon! It's sad,

but true. You can find Peeps in the form of bunnies and chicks and in an array of spring colors. They don't have quite the same edible appeal for me as an adult although I did indulge in a few of the extras. I have discovered other uses for Peeps on Pinterest. You can use them in smores, as drink toppers and in flower vases. The photo above is my attempt at copying the vase idea. The hardest part of putting it together was getting the last bunny to fit without disfiguring it. You also need to find two vases where one will fit inside the other and allow enough room to fill the candy around it. The bonus is there are usually a few extra left over for eating.
