Navigating My Blog

Description

I'm planning to do some giveaways of my favorite things in December so I thought I would clarify how to navigate my blog in case there is any confusion. Some of my less computer savvy friends have been asking me questions on how to do certain things like leave a comment or subscribe by email. I can totally sympathize because I'm not a tech savvy person either, but I'm learning because of blogging. I will try to explain things as best I can and if I'm in error on something please let me know. Your feedback is important and a few things have been corrected that weren't working properly in the beginning, but I think all the kinks have been worked out.

To subscribe to my blog

You can sign up through email or an RSS feed. If you don't follow multiple blogs then email is the easiest option. When you subscribe you will automatically get a message sent to you in your inbox or news feed every time I post something new. If you look to the right of my blog you will see a box that says Get Free Updates. Your options are RSS feed, email and twitter.

Email- click on button, a feedburner page should come up that looks like this

Sharing is caring gives you several ways to share: facebook, twitter, pinterest, linkedin, stumbleupon, send via email and print a post. All of these things are at the bottom of my post, but you need to view them from my website. Once again, this means if you are viewing a post from email and want to share or comment just click on the title and it will take you to my website. I hope if you enjoy reading something on my website that youâ€™ll share it with others through one of these ways. Please send me an email or leave a comment if you have any questions or if something isnâ€™t working properly on your end.
